Prithvi sagar Ganesh

AI Driven | Certified Project Manager (PMP®) | Agile Practitioner | Delivering Excellence in Project Execution and Team Leadership
Greater Toronto Area, Canada

Summary

Results-driven Senior Program & Delivery Leader with 15+ years of experience managing multi-million-dollar technology and AV integration programs across enterprise, government, and private sectors. Proven ability to drive end-to-end program execution, establish governance frameworks, and lead cross-functional teams to deliver strategic outcomes on time and within budget. PMP®-certified with newly acquired expertise in Generative AI tools, AI workflow automation, custom AI agents, and N8N automation — actively integrating AI-powered methods into project management practices to accelerate delivery, improve reporting accuracy, and optimize resource planning.

Experience

Global Unified Solution
Service Operations Manager
June 2025 - Present (1 year 2 months)

Recruited to lead enterprise IT services delivery operations, overseeing multiple simultaneous technology infrastructure programs including network installations, telephony, CCTV, Office 365 integrations, and hardware refresh projects for enterprise and healthcare clients.

Global Unified Solution Services Inc.
Professional Services/Operations Manager
June 2025 - June 2026 (1 year 1 month)
Mississauga, ON

Key Responsibilities:

- Lead end-to-end delivery of AV and technology professional services across enterprise clients, ensuring seamless execution of installations, integrations, and managed services aligned with SLAs.

Manage cross-functional teams (engineering, field technicians, support, and PMs) to deliver conferencing systems, digital signage, control systems, and unified communication platforms.

- Implemented standardized service delivery frameworks and operational processes, improving project turnaround time and reducing service escalations.
- Act as primary escalation point for critical client issues, ensuring rapid resolution and maintaining high customer satisfaction and retention.
- Establish and monitor KPIs and performance dashboards (SLA adherence, delivery timelines, incident resolution), enabling proactive executive decision-making.
- Leverage AI-powered project management tools and automated reporting workflows (N8N, AI agents) to streamline status updates, risk tracking, and resource utilization analysis — reducing manual reporting effort by ~30%.
- Apply prompt engineering and Generative AI tools to accelerate RFP response preparation, project documentation drafting, and stakeholder communication templates, improving turnaround speed.
- Utilize AI workflow automation to synthesize KPI data into executive dashboards, enabling real-time insight into program health and service performance across concurrent engagements.
- Collaborate with sales and solution architects to scope, estimate, and design AV solutions, ensuring alignment with client requirements and operational feasibility.
- Ensure compliance with industry standards, safety regulations, and organizational governance policies across all service engagements.

Design Electronics
Project Manager
February 2025 - June 2025 (5 months)
Niagara, ON

Key Responsibilities:

- Managed complex delivery programs from contract initiation to service transition, ensuring alignment with scope, cost, and schedule.

- Developed and maintained integrated program plans, identifying dependencies, risks, and mitigation strategies.

- Led cross-functional coordination across delivery, sales, and operations teams.

- Implemented project governance standards, tools, and ERP-integrated change order workflows, reducing administrative cycle time.

- Managed financial performance including delivery cost tracking, margin analysis, billing reconciliation, and AR collection.

- Applied AI-assisted scheduling and risk analysis tools to develop project plans faster and identify schedule conflicts earlier, reducing planning cycle time.

- Utilized Generative AI tools to auto-generate status reports, meeting summaries, and change order documentation — improving PM bandwidth and consistency of client communications.

- Leveraged AI workflow automation to track and flag budget variances in real time, enabling faster corrective action and protecting project margins.

AVI-SPL Canada
Project Manager
January 2023 - September 2024 (1 year 9 months)
Toronto, Ontario, Canada

Key Responsibilities:
• Oversee all project activities, including change management, to ensure timely and budget-compliant delivery of project deliverables that meet client scope and quality standards, in line with established AVI-SPL Project Management principles and procedures.
• Develop a comprehensive understanding of contract documents for each project, including scopes of work, bid drawings, specifications, contracts, subcontractor scopes, and construction schedules.
• Create and manage a detailed work breakdown structure and project schedule, ensuring appropriate resource allocation for all project tasks.
• Facilitate internal project kick-off meetings with key participants from sales, engineering, fabrication, installation, programming, and relevant corporate or third-party resources.
• Lead external project kick-off meetings with necessary external stakeholders and applicable internal resources.
• Collaborate with the technical team during the implementation and setup of AV, digital signage, and video conferencing systems.
• Experience in site circuit setup.
• Serve as the primary point of contact for all internal and external project communications, maintaining accurate records of project status and activities.

• Address customer communications regarding problems or concerns promptly and professionally.
• Provide regular job progress reports to internal and external stakeholders, escalating issues to office management as needed.
• Gather daily site progress updates from lead technicians and address identified needs.
• Manage the ordering of equipment and materials for projects post-engineering approval.
• Oversee equipment distribution and shipping, ensuring compliance with pick ticketing, packing slip, and sign-off processes.
• Monitor all project expenditures (equipment, labor, miscellaneous costs) throughout the project lifecycle, identify problem areas, lead resolution efforts, and communicate any issues affecting profitability to management.

hitplay .
Project Manager - AV Integration
February 2020 - January 2023 (3 years)
Toronto, Ontario, Canada

Key Responsibilities:
• Lead Design-Build projects from contract award to handover, ensuring clear scope alignment with clients.
• Serve as the primary liaison for client communications, managing approvals, progress reports, and coordination with third-party firms.
• Review project documentation to create implementation plans with milestones and resource allocations.
• Facilitate kick-off meetings to brief team members on project specifics and coordination needs.
• Oversee task assignments and ensure timely execution and follow-up.
• Verify quality of installations and programming at milestone checkpoints.
• Collaborate with the technical team on AV, digital signage, and video conferencing system setups.
• Implement the hit play process and quality standards for installations and client onboarding.
• Lead Lessons Learned meetings to share best practices and drive future improvements.
• Monitor KPIs related to labor expenses and provide project closeout summaries.
• Approve timesheets and invoices for project resources.
• Drive continuous improvement of internal processes and the project playbook.

• Mentor team members to enhance capabilities.
• Work with management to implement technology solutions for improved productivity and competitiveness.

Qatari Computer Systems
Project Engineer
February 2014 - June 2019 (5 years 5 months)
Doha, Qatar

Key Responsibilities:
• Led a prestigious award-winning mixed-use development project, recognized with the Smart City Award in Barcelona (2018). This $12 million CAD project focused on smart building concepts, encompassing systems such as Audio Visual, IPTV, lighting control, BAS, HVAC, smart home systems, and guest room management across 14 high-rise buildings and a hotel tower.
• Coordinated with the technical team during the implementation and setup of AV, digital signage, and video conferencing systems, including Cisco, Teams, Zoom, Crestron, and Polycom.
• Demonstrated expertise in site circuit setup.
• Managed the development of a high-end rehabilitation center featuring advanced medical facilities for addiction treatment, valued at $8 million CAD. This project included 10 independent buildings with 126 patient rooms, five villas, and various medical amenities. Systems implemented comprised multi-room AV, control engineering, public address systems, guest room management, IPTV, and complete audio-visual solutions for the auditorium, alongside third-party integrations with Crestron, Opera, and more.

Qlite Limited
Technical Support Engineer
June 2012 - February 2014 (1 year 9 months)
United Arab Emirates

Key Responsibilities:
• Successfully managed a project in Oman, leading to the acquisition of additional contracts valued at $2 million CAD.
• Developed technical designs and schematics for a lighting automation system at Muscat Airport.
• Designed and programmed centralized lighting and dimming controls for the Gulf International Petroleum Headquarters, a 32-floor high-rise building.
• Collaborated with the technical team during the implementation and setup of AV, digital signage, and video conferencing systems, including Cisco, Teams, Zoom, Crestron, and Polycom.

• Gained experience in site circuit setup.
• Monitored and ensured the successful implementation of 485 daylight harvesting systems with sensors at the Institute of Applied Technology.
• Programmed guest room management and lighting management solutions for leading hotel chains.
• Managed multiple projects across various sectors, including hospitality, healthcare, and government, covering banks, palaces, and military facilities.

Q-Lite Global

Technical Support Engineer

June 2012 - January 2014 (1 year 8 months)

Managed technology infrastructure projects including CCTV, lighting automation, and low voltage system design at Muscat International Airport and a 32-floor commercial headquarters — delivering $2M+ in contract value.

Nivosys Technologies

2 years 10 months

Technical Lead

September 2009 - June 2012 (2 years 10 months)
Bengaluru, Karnataka, India

Key Responsibilities

• Designed, installed, and programmed multi-room AV solutions for a high-end office facility.
• Developed and implemented Polycom video and audio conferencing systems for a multi-specialty hospital.
• Gained experience in site circuit setup.
• Designed, installed, and programmed conference room automation and multi-room audio-visual systems for a major automotive company.
• Created and implemented guest room solutions for a five-star hotel.
• Designed, installed, and programmed Honeywell security systems for an international tobacco company.
• Developed and implemented DALI systems for banking premises.

Technical Engineer

September 2009 - June 2012 (2 years 10 months)

Designed, installed, and programmed multi-room AV, Polycom telephony/video conferencing, conference room automation, and DALI lighting systems for offices, hospitals, and hotels.
